\* Note that this is approximate and can vary substantially between gender and individual children. To be used as a rough guide only.

\*\* We greatly recommend that you determine the size range you need by US size (or by age) but order from us in Euro sizes.

\*\*\* Since the physical size (interior length) difference between a US size and a Euro size is not exactly the same, we have inserted – like all European shoe vendors - some US “half sizes” (4.5, 9.5, 13.5 and 3.5) to keep the scales aligned as they otherwise gradually would get out of kilter.

\*\*\*\* Thus, do not skip over the Euro sizes for the US “half sizes” (Euro size 20, 26, 31 and 35) because the difference in interior length is equal between all Euro sizes and if you skip a Euro size, you will end up with a “gap” from a fitting perspective.
